ASTRA AUTOMATION

WE BUILD YOUR GROWTH ONLINE

DESIGNED AROUND YOUR BUSINESS

A website built for your business.

Clear scope. Mobile-friendly design. Transparent build and running costs.

01 Launch page

For one offer, a new launch or a professional introduction.

1 scrolling page, up to 6 sections • WhatsApp and click-to-call buttons
Social links • Search-engine setup • Developer-managed content

Delivery: 5-7 working days | 2 revision rounds

Website development (one-time)	Maintenance (optional, billed separately)
₹12,000	**₹500 / month**

02 Business website

For service businesses that need a complete online presence.

Up to 5 pages • Contact form to one email inbox • Map embed
Service/gallery sections • Search-engine setup • Developer-managed content

Delivery: 10-15 working days | 2 revision rounds

Website development (one-time)	Maintenance (optional, billed separately)
₹24,000	**₹1,000 / month**

03 Managed-content website

For businesses that want to update their own content.

Up to 10 public pages • 1 admin login • Edit service and blog entries
Store enquiries and export CSV • Up to 20 initial entries • Database setup

Delivery: 15-25 working days | 3 revision rounds

Website development (one-time)	Maintenance (optional, billed separately)
₹42,000	**₹2,000 / month**

Every package includes: responsive layouts using your branding and content, image optimisation, page titles/meta descriptions, sitemap, SSL/domain connection, launch testing and 30-day bug-fix support.

Optional maintenance, backend hosting, database, domain and applicable taxes are separate from the build price. Your written quote confirms the full scope and any frontend hosting arrangements.

Your website. A clear cost plan.

Planning estimates in INR, before taxes. Providers bill separately at actual cost.

Running cost	Monthly	Annual
Render Starter backend - package 03	**~₹630**	**~₹7,560**
MongoDB Atlas Flex DB - package 03	From ~₹720	From ~₹8,640
Standard domain - budget allowance	Annual billing	₹2,000
SSL certificate / HTTPS	Included	₹0

Cost basis: Render Starter hosts the backend at $7/month. MongoDB Atlas Flex stores the data: $8/month base with 5 GB, rising with usage up to $30/month (~₹2,700); billed hourly. **Both are included in package 03 running-cost totals.** Estimates use ₹90/USD, not a live rate. Domain is an allowance; frontend hosting is outside these totals.

Optional monthly care

Launch ₹500 (30 minutes) • **Business ₹1,000** (1 hour) • **Managed ₹2,000** (2 hours)

Monthly health check, dependency review and minor text/image edits within your monthly allowance (unused time expires each month). Managed care adds a monthly database export and quarterly restore check. Further work is agreed with you at ₹1,000/hour.

Package	Year 1*	Renewal/year*	Optional care/mo
Launch page	₹20,000	₹8,000	₹500
Business website	₹38,000	₹14,000	₹1,000
Managed-content	₹84,200	₹42,200	₹2,000

*Includes build (year 1 only), domain, Render backend + MongoDB database for package 03, and 12 months of optional care. Without care, deduct ₹6,000 / ₹12,000 / ₹24,000. Excludes frontend hosting, taxes, FX fees and additional usage. Provider estimates assume base usage and unchanged rates.

Your project, step by step.

Comfortable payment milestones

Reserve your project with 50%, pay 30% once you approve the design, and the final 20% before launch and source handover. Domain and provider costs are paid upfront or directly to the provider. Your written quotation is valid for 15 days.

Design shaped by your feedback

Each package covers one language and one agreed design direction. A revision round brings your feedback together in one list within that scope. Additional standard pages start at ₹2,000; further revisions are ₹1,000/hour. We agree estimates for additions before proceeding.

Planning your launch together

Please share your final text, brand assets, images and required access. Delivery starts once the advance and these inputs are ready. Feedback within 3 working days helps keep the schedule; if more time is needed, we adjust the launch date together. Copywriting and migration are separate services.

Your backend, database and domain

We recommend keeping billing accounts in your name. Package 03 uses Render Starter for backend hosting and MongoDB Atlas Flex for the database; both appear in its running-cost totals. Packages 01/02 have no dedicated backend or paid database charge. Domain renewals are at actual cost.

Choosing supporting services

Frontend hosting arrangements and any cost responsibility are agreed before launch; no frontend hosting subscription is included in these totals. Backend and database charges depend on provider usage and rates. Email, mailboxes, paid media and external APIs are additional at actual cost.

Support after your launch

Enjoy 30 days of bug fixes within the delivered scope. Optional care is paid monthly in advance and may be cancelled before the next cycle. Support is Mon-Fri, 10am-6pm IST, excluding holidays, with a first response within 2 working days. Resolution time depends on the issue; redesigns and new features are quoted separately.

Your website and flexibility

After full payment, you receive the source files and agreed admin access. Third-party licences continue to apply. If plans change, we settle completed work and non-recoverable provider costs, refund the unused advance and hand over the work paid for.

A shared understanding

Checkout, payments, customer accounts, booking engines, automation and marketing are separate services. Rankings, enquiry volumes and uninterrupted availability are not guaranteed. Before launch, you approve content and privacy/consent text and confirm rights to supplied materials. Applicable taxes are shown on the invoice.

Let us bring your ideas online. Share your business name, preferred package, pages and a couple of websites you like on WhatsApp. We will help shape your scope and prepare a clear written quote.
